

Cola[®]Mulse FE

Fragrance Emulsifier

CTFA/INC: peg-8 laurate and laureth 4

DESCRIPTION

Cola[®]Mulse FE is a 100% active, nonionic product designed to incorporate oil-based fragrances in anionic water-based formulations.

By pre-blending **Cola[®]Mulse FE** with a fragrance of choice, the formulator can incorporate large amounts of oil-based fragrances or difficult fragrances into anionic water-based formulations while maintaining the clarity and performance characteristics of the finished product. We recommend that **Cola[®]Mulse FE** be used at ratios of 3 to 1 up to 6 to 1 of fragrance to **Cola[®]Mulse FE**.

The key to **Cola[®]Mulse FE** is that it will cold mix the fragrance into the formulation.

TYPICAL PROPERTIES

Appearance	Clear Liquid
pH	6.0 to 8.0
Activity	> 98%
Viscosity	50 cps
Color	Klett 150 max.

TYPICAL FORMULATIONS

BODY WASH
